

Progress made

Creating Chrome Extension(Developer Mode)

- Using the google reference document in order to correctly create chrome extension <https://developer.chrome.com/docs/extensions/mv3/getstarted/>
- Created Manifest file
- Created Content file
- Tested loading in and using a sample chrome extension we created

Web Scraper

- Completed implementing web scraper
- Word Tokenization
- Lemmatization
- Stop word filtering

Remaining tasks

Remaining tasks that we have to complete:

- Integrating Chrome extension with web scraper
- Complete Manifest file
- Complete main file
- Integrate Python code with Javascript
- Implement BM25 ranking
- Implement word statistic generation
- Read Me and other Documentation as we go

Any challenges/issues being faced

No challenges being faced thus far.
